

YASHWANTH RAJ MIRYALA

Data Analyst

Hyderabad, Telangana, India | +91 73964 93761 | yashwanthmiryala5@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Entry-level Data Analyst with demonstrated ability to independently clean, analyze, and visualize large datasets—including a 180,000-record supply chain platform and an AI-assisted cybercrime intelligence dashboard built with Python, SQL Server, and Power BI. Completed virtual job simulations with Deloitte Australia and Tata iQ via Forage, gaining hands-on exposure to real-world data analytics, Tableau, Excel, and GenAI workflows. NASA Space Apps Challenge finalist and published researcher. Seeking a data analyst role where strong analytical foundations and project experience deliver immediate business value.

TECHNICAL SKILLS

Data Analytics: Data Cleaning, Exploratory Data Analysis (EDA), KPI Reporting, Dashboard Design, Business Intelligence, Data Visualization, Statistical Analysis, Risk Profiling, Data Storytelling

Tools & Platforms: Power BI, Tableau, Microsoft Excel, Jupyter Notebook, SQL Server, Git, VS Code, Streamlit

Programming & Libraries: Python, SQL, Pandas, NumPy

Concepts: Predictive Analytics, AI-Driven Analytics, Generative AI (GenAI), Agentic AI, Data-Driven Decision Making, Ethical AI, Regulatory Compliance

VIRTUAL JOB SIMULATIONS

Deloitte Australia | Data Analytics Job Simulation | *Forage* | May 2026

- Completed a job simulation involving data analysis and forensic technology, simulating real-world analyst responsibilities at a Big 4 consulting firm.
- Created a data dashboard using Tableau to visualize findings and support business decision-making.
- Used Excel to classify data, identify patterns, and draw actionable business conclusions.

Tata Group (Tata iQ) | GenAI Powered Data Analytics Job Simulation | *Forage* | May 2026

- Completed a job simulation involving AI-powered data analytics and strategy development for the Financial Services team at Tata iQ.
- Conducted exploratory data analysis (EDA) using GenAI tools to assess data quality, identify risk indicators, and structure insights for predictive modeling.
- Proposed and justified a no-code predictive modeling framework to assess customer delinquency risk, leveraging GenAI for structured model logic and evaluation criteria.
- Designed an AI-driven collections strategy incorporating agentic AI, automation, ethical AI principles, regulatory compliance, and scalable implementation frameworks.

DATA ANALYTICS PROJECTS

Supply Chain Intelligence Analytics Platform | *Python, Pandas, SQL Server, Power BI*

- Ingested and cleaned 180,519 raw logistics records, producing 180,511 analysis-ready rows across 35 engineered columns — including shipping delay, delivery performance, profit margin, revenue per unit, order size, and sales tier features.
- Designed a Power BI dashboard tracking \$36.78M revenue, \$3.97M profit, 118 products, and regional performance, surfacing a 57.28% order delay rate to support logistics risk and optimization decisions. [View Dashboard →](#)

Flipkart Product Analytics Dashboard | *Python, SQL Server, Power BI*

- Processed and standardized 20,001 product records across 17 attributes including pricing, discounts, brand categories, ratings, and premium outliers.
- Engineered discount percentage and price-outlier features; built an interactive Power BI dashboard with KPI cards, category trends, brand-level performance, and sales overview filters. [View Dashboard →](#)

AI-Powered Indian Cybercrime & Threat Intelligence Platform | *Python, SQL Server, Power BI, Streamlit*

- Analyzed 1,200 cybercrime incident records to map attack types, city-level risk, sector impact, and financial loss patterns across yearly trends.
- Developed a full analytics workflow integrating Python, SQL, and Power BI, augmented by a Streamlit AI assistant enabling natural-language KPI querying and question-answering support. [View Dashboard →](#)

Customer Behaviour Analysis | *Python, SQL Server, Power BI*

- Cleaned and standardized retail transaction data by resolving inconsistent categories, imputing missing values using business logic, and restructuring columns for SQL compatibility.
- Extracted behavioral insights across purchase patterns, payment methods, discount response, and seasonal demand to inform customer segmentation and marketing strategy. [View Dashboard →](#)

Sachin Tendulkar Cricket Analytics Dashboard | *Python, SQL Server, Power BI*

- Analyzed Sachin Tendulkar's career batting statistics across formats, identifying performance trends, milestone patterns, and match-winning contributions.
- Built an interactive Power BI dashboard visualizing career runs, centuries, strike rates, and format-wise performance breakdowns. [View Dashboard →](#)

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering

Pallavi Engineering College | 2025 | CGPA: 6.62 (61.2%)

ACHIEVEMENTS & PUBLICATIONS

- Placed 7th out of 50+ teams in the NASA Space Apps Challenge.
- Published research paper "Data Protection and Privacy" at the International Conference on Women Safety in Cyber Security.
- Finalist, Ideathon 2021 | Participant, Deco Global Hackathon.
